### OBJECTIVES

This article aims to conduct a literature review to discuss the importance of physical medicine and rehabilitation in various disorders.

### DESIGN

The study carried out was a narrative bibliographic search.

### RESULTS

Physical and rehabilitation medicine works with a holistic view of the individual and aims to develop the functional potential and their family, professional and social reintegration.

### CONCLUSIONS

Therefore, knowing the history of physical medicine and information is relevant to understand the fundamental function of this specialty in the rehabilitation process.
